

# Project Highlight

## ***The University of Alabama at Birmingham Comprehensive Cancer Center***

The UAB Comprehensive Cancer Center is the only "comprehensive" center as designated by the National Cancer Institute in the Deep South.

The UAB Comprehensive Cancer Center has held this elite status for more than 35 years through our efforts in cancer research, treatment and education.

Thousands of patients are treated every year for every type of cancer. The Center has approximately 300 faculty members, many of whom both conduct research and treat patients. Because of this, the Center is often able to offer state-of-the-art treatments not available anywhere else.

*Crossroads: Cancer Center Magazine* is the Comprehensive Cancer Center's primary educational tool. The magazine includes news stories, features and profiles highlighting the most current cancer-related news of prevention, treatment and research.

For more information on the UAB Comprehensive Cancer Center, visit: [www3.ccc.uab.edu](http://www3.ccc.uab.edu).
